WEB SERVICE

FOOD ORIGINS (1/2)

<https://en.vietnamplus.vn/vietnam-to-build-product-origin-site/145972.vnp>

FOOD ORIGINS (2/2)

YOUR ATTESTATION

- Implement a **restful web service** to provide **product information** of your choice
 - ❑ Input: product bar code/QR code
 - ❑ Output: product information
- Mode: individual
- Maximum time: **120 minutes (13h-15h)**
- Submission
 - ❑ Submit your **single zip file to e-learning**
- Final result demonstration
 - ❑ Notifying your lecturer and/or TA

YOUR PRODUCT DESIGN

- Choose an agricultural product of your choice
 - E.g., Guava Grapefruit
- Prepare your product information in your PostgreSQL (**at least 5 features**)
 - **Product of**: Bien Hoa, Dong Nai, Vietnam
 - **Farm**: Tan Trieu Grapefruit
 - **Website**: <http://tantrieugrapefruit.com/guava>
 - **Energy**: 28 kcal/100g
 - **Expired date**: before 05/08/2020

IMPLEMENTATION (1/2)

- If the **last digit** of your **student number** is **odd**
 - ❑ ProductID for example: 9049049199999
 - ❑ The webservice is with **GET method**
- If the **last digit** of your **student number** is **even**
 - ❑ ProductID for example: 9059089199898
 - ❑ The webservice is with **POST method**
- You can use any free service to generate your bar code or QR code
 - ❑ Bar code: <https://barcode.tec-it.com/en>
 - ❑ QR code: <https://www.qr-code-generator.com/>

IMPLEMENTATION (2/2)

- Minimum requirements
 - ❑ Complete your web service with either GET or POST method for text code (7 points)
 - ❑ Demo with Postman (1 point)
 - ❑ Your application can scan your bar code/QR code in the form of image (2 points)
- Bonus
 - ❑ Application with GUIs (1 point)
 - ❑ Product image can be displayed on GUI (1 point)
